Understanding our size chart.

**Chest...** The measurement is taken with the jersey laying flat and measuring directly under the sleeve or bottom of the arm hole across to the other size. Using an adult medium as the example, the jersey measures 42". That measurement is how big around the chest of the jersey is measuring both front and back, not the size chest the jersey will fit. We recommend taking a shirt or jersey you like the fit of and measuring across the shirt at the point where the bottom of the sleeves attach to the body of the shirt. Double that measurement and you have the chest measurement of that shirt. Use that information to understand how that compares to our chart.

**Waist...** The sizes on the chart reflect the full size of the waist of the garment in the relaxed (not stretched) position. You want the elastic snug to hold up your shorts. Example: A size Medium 30" waist will be too large for a player with a 30" waist as the elastic is not stretched.
