Understanding our size chart.

**Chest...** The measurement is taken with the shirt / jersey laying flat and measuring directly under the sleeve or bottom of the arm hole across to the other side. Using an adult medium as the example, the jersey measures 20" across the front, double that measurement which is 40", that is how big around the chest of the shirt / jersey is, not the size chest the jersey will fit.

**Length...** The measurement is taken with the shirt laying flat from the top of the shoulder against the collar to the bottom of the shirt.
