### Understanding our size chart.

**Chest...** The measurement is taken with the shirt / jersey laying flat and measuring directly under the sleeve or bottom of the arm hole across to the other side. Using an adult medium as the example, the jersey measures 34-35" for the chest. That is how big around the chest of the shirt / jersey is, not the size chest the jersey will fit, and the jersey has approximately 1" of stretch in the fabric, so 34" is the material in the "relax" state. If you are comparing to another shirt you own divide the number in half to 17" to measure the front side. Measure a garment you like and the will give you a relative idea on how our sizing compares to something you have worn previously.

**Length...** The measurement is taken with the shirt laying flat from the top of the shoulder against the collar to the bottom of the shirt.
