- *Chest measurements at taken with the garment laying flat at the bottom of the sleeves going across the shirt from edge to edge. You double that measure for the chest size of the shirt. Example... an adult large has a chest measurement of 25" which means the total size would be 50".*
- *Waist measurements are the full front and back size and are taken using the large number listed. Example an adult medium waist measure 32".*
- *Body chest measurements are taken using a soft tape measure. Hold your arm straight out and measure around the full chest.*
